

# Delta1 Trading Platform Welcomes a New Application!

MONDAY 08/19/2019 Introducing DeltaOne, a trading front-end for the Delta1 FIX Service

## DELTAONE Trading Front-end *BETA* (1.0)

DeltaOne is a no-install front-end for the OneChicago Delta1 FIX Service, delivered through Java Web Start using the Java Network Launching Protocol (JNLP). Simply ensure the minimum [System Requirements](#) on your Windows workstation and launch the application. More information regarding this application is located in the [DeltaOne Trading Front-end](#) documentation home and can be launched from the [Delta1 Applications](#) page.

## Whats Available?

The BETA release is available for use today in both production and user acceptance testing environments.

- **Live Market Data** - See best bids and offers in real-time for any instrument in the Delta1 universe
- **Book Depth** - View fill depth of book in real-time for any active market
- **Basis Point Yields** - For all market data, orders, and trades
- **Order Entry** - Interact with the Delta1 markets through point and click order entry
- **Bid/Offer All** - Select markets directly from [Watchlists](#) and simultaneously enter bids/offers filling each at the top of book with a single instruction
- **Batch Order Entry** - Drag and drop or upload a list of order entry instructions to enter up to 500 orders at a time

## What's in the Pipeline ...

The next release is on its way.

- **Trade Reporting** - Post bilaterally negotiated off-exchange trades directly to the Delta1 trade reporting engine with counter-party confirmation
- **Batch Trade Entry** - Drag and drop or upload a list of completed trade instructions and stream to the Delta1 trade reporting engine
- **Excel Integration** - Create dynamic linking between watchlists and spreadsheets for real-time updates into existing workbooks
- **Enhanced Market Scanning** - Scan for markets in real-time, create scheduled scans and add event based triggers.

## Your Feedback is Important

Think of a feature you'd like added to this application? Let us know! Send an email to [ops@onechicago.com](mailto:ops@onechicago.com).
