

Scan Markets

The scan market utility uses the OneChicago public [Quote Scan](#) to query for MPSecIDs matching the provided criteria. The resulting MPSecIDs are then added and subscribed to the designated Watchlist.

- Selecting 
- Pressing *Ctrl + Shift + S*.
- [Window > Scan Markets](#)

Using the request filters provided select the desired criteria, designate the Watchlist that will receive the results (note if an existing Watchlist is selected then the results will replace the contents of the list), then click "Scan". To create a new Watchlist from the results simply enter the desired name of the Watchlist instead of selecting an existing one ([Adding Instruments from Scan Markets](#)).

The image shows a screenshot of a software window titled "Scan Markets". The window contains several input fields and a "Scan" button. The fields are:

- Request Type: Best Bid Rates (dropdown menu)
- Product Class: Outright SSF (dropdown menu)
- Front Expiration: ALL (dropdown menu)
- Back Expiration: ALL (dropdown menu)
- Size >: 1 (text input field)
- Underlying Symbol: ALL (dropdown menu)
- Watchlist: My View (dropdown menu)

A "Scan" button is located at the bottom right of the dialog box.
